Indonesia (Willing to relocate)

arigourumsah@gmail.com

Data Scientist and Analytics Professional with 4+ years of experience across machine learning, data engineering, and business intelligence. Experienced in developing predictive models, building Python and SQL-based ETL pipelines, analysing large-scale datasets, and translating complex data into actionable business insights. Skilled in statistical analysis, NLP, data visualisation, and end-to-end data workflows, with a proven track record of delivering measurable improvements in reporting efficiency, operational performance, and strategic decision-making.

PROFESSIONAL EXPERIENCE

PT Dunia Sempurna Teknologi - Indonesia

Data Scientist and Content Creator (December 2024 - Present)

- Lead development of an end-to-end Python and SQL-based content-recommendation system: define data contracts, build data pipelines, design a database, and integrate a backend API for a **460+ game catalogue**.
- Build a hybrid recommendation system using game metadata, categories, and TF-IDF features to generate personalised **top-3 recommendations** for registered users, with **mean computation time below 1 ms**.
- Co-lead strategy across 3 social-media platforms, delivering 2-4 long-form and 8+ short-form assets monthly while coordinating 2 contributors; grew YouTube to **409K+ views**, **5.1K+ watch hours**, and **880 subscribers**.

Plataran Indonesia - Budapest, Hungary (Part-time)

Data Analyst - Food & Beverage Operations (August 2023 - May 2025)

- Designed and automated operational data pipelines and reporting workflows using Microsoft Excel and Google Sheets, **reducing reporting time by 40%**.
- Developed a Google Data Studio dashboard used by 5 cross-functional stakeholders to monitor weekly restaurant sales and employee performance KPIs, **reducing weekly performance review time by 75%**.
- Conducted monthly financial and operational analyses to identify cost-saving opportunities, contributing to a **15% improvement in net margins**.
- Communicated analytical findings and recommendations to both technical and non-technical stakeholders.

PT. Gosantha Global Indonesia - Yogyakarta, Indonesia

Data Engineer (August 2019 - August 2022)

- Built and maintained Python and SQL-based ETL pipelines on Odoo ERP, **supporting automated data workflows for 100+ users** and **reducing manual reporting time by 30%**.
- Led cross-functional integration between POS and 5+ ERP modules, consolidating product, customer, and transaction data and reducing **reconciliation effort by 25%**.
- **Analysed 100,000+ transactional records** to identify data integration bottlenecks, improving data flow efficiency and **system responsiveness by 20%**.

EDUCATION

Corvinus University of Budapest - Budapest, Hungary

Master's Degree in International Economy and Business

Specialised in **Economic Data Analysis**. Studying under the Stipendium Hungaricum Scholarship - 4.54/5.00 GPA

Gadjah Mada University - Yogyakarta, Indonesia

Bachelor's Degree in Computer Science

Specialised in **Data Science** and **Machine Learning**. Graduated with Honours - 3.42/4.00 GPA

END-TO-END DATA SCIENCE PROJECTS

Laptop Pricing Analytics and Predictive Modelling

- Developed an ML regression model to estimate laptop prices across seven algorithms, with XGBRegressor achieving an **R^2 of 0.897** and **RMSE of 225.51** via feature engineering and preprocessing pipelines.

Telecommunication Customer Churn Prediction

- Developed a customer churn prediction model using supervised machine learning, feature engineering, SMOTE, and hyperparameter tuning, achieving an **ROC-AUC of 0.75** and an **F1-score of 0.61**.

Multi-Class Sentiment Classification of Product Reviews Using Classical NLP Models

- Built a multi-class sentiment classifier for product reviews using text preprocessing and TF-IDF across five algorithms, with Logistic Regression achieving a peak **Macro F1-score of 0.655** via cross-validated tuning.

Pure Python Customer Review Sentiment Classification

- Engineered a custom binary sentiment classifier in Python, implementing a Laplace-smoothed Naive Bayes algorithm and TF-IDF pipeline to achieve **95% test accuracy**, matching tuned scikit-learn implementations.

SKILLS

Programming & Data Science: Python (Pandas, Scikit-learn), SQL (PostgreSQL, MySQL), Git, JavaScript, XML

Machine Learning & Statistical Analysis: Statistical Analysis, Predictive Modelling, Classification, Regression, Natural Language Processing (NLP), Feature Engineering, Model Evaluation, Hyperparameter Tuning

Data Visualisation & BI: STATA, Tableau, Google Data Studio, Microsoft Excel, Google Sheets, Data Storytelling

Deployment & APIs: FastAPI, Flask, Postman

Languages: English (Native), Indonesian (Native), Japanese (N5, currently working towards N4)
